

Mill Lane Primary School Crossing Roads

Adopted :June 2015

Review Date : June 2018

When using the local area it is imperative that all pupils are aware of the need to be responsible and keep themselves safe.

In order to achieve this Mill Lane Primary School uses the following ways of crossing the road.

Before leaving Mill Lane School, the teacher in charge should inform the group of the road crossing procedure and practice in the playground or hall if this is the first time out of school.

High visibility jackets should be worn at all times and adults should be spaced evenly amongst the children.

Children are to line up along the pavement, away from the edge and only cross when instructed to do so by the teacher in charge. There should be a teacher at either end of the line and other teacher spaced along the line.

The children must cross all together with an adult at either end of the group.

In a situation where space/situation does not allow the group to line up pupils should form a compact group and cross together. Teachers should, at all times, be aware of oncoming traffic.

When the oncoming traffic situation is obscured (bend in road, junctions, parked cars etc) then the teacher in charge is to cross first and move to a position which allows them to see both traffic and the children. Cross as above.

Before all road crossings, ensure that the children are attentive and informed of what they are to do.
